Hesaby.ai حسابي

BRAND DESIGN BRIEFING · V2.0

New Brand Identity & Logo System Creative Brief

A comprehensive design briefing and technical specification for brand designers, creative agencies, and AI design systems. Built to inspire bold, original visual concepts connecting dusty construction job sites to high-precision financial ledgers.

PROJECT	CORE MISSION	MANDATE	TARGET MARKET
Hesaby.ai (Construction ERP)	The Site-to-Office Live Ledger	100% Open Creative Exploration	Egypt (Bilingual AR / EN)

1. Company & Product Mission

1.1 What Hesaby Is

Hesaby (حسابي, Arabic for *"my account / my calculation / my ledger"*) is an AI-powered construction ERP system built specifically for Egyptian contractors, site engineers, and construction firm owners. It is the **site-to-office live ledger** — the single operational bridge that connects the dusty, fast-moving reality of a construction site to the financial rigour and compliance of the back-office.

1.2 The Problem It Solves

Egyptian construction traditionally operates on crumpled paper receipts, unlogged cash advances, fragmented WhatsApp voice notes, and bloated Excel sheets. Every weekend, site engineers and accountants spend grueling hours reconciling what was spent, who authorized it, and which project safe it impacts. Receipts fade or vanish in pockets. Three conflicting versions of the financial truth exist simultaneously (site logs, office accounts, bank statements). Contractors rarely discover true project cost overruns until project completion.

> **The Hesaby Solution:** Replace fragmentation with a single real-time ledger. Engineers photograph a paper receipt or speak an Egyptian Arabic voice note; the AI engine parses vendors, amounts, materials, and 14% Egyptian VAT, instantly updating project safe balances with granular audit trails and hierarchical approval gates.

1.3 Target Users & Operational Context

Role	Operational Environment & Context	Primary Needs & Pain Points
Site Engineer	Directly on active job sites, 40°C summer heat, gloves, sun glare, dusty smartphones.	Rapid 1-hand receipt capture, offline logging, instant custody balance display before spending.
Project Manager	Traveling between 3–10 simultaneous sites, car laptop, brief site visits.	Real-time project cost vs. budget variance, instantaneous multi-tier expense approvals.
General Manager / Owner	Corporate boardroom or executive mobile review.	Net profit margins per project, supervision fees, cash liquidity, company-wide safety.
Financial Manager	Head office accounting desk, multi-screen environment.	Double-entry ledger integrity, Egyptian 14% VAT compliance, CSV bank reconciliation.

Market & Geography

REGIONAL

- **Primary:** Egypt (Egyptian Pound EGP, 14% VAT, Egyptian Arabic dialect).
- **Expansion:** GCC firms with active Egyptian development branches.
- **Language Hierarchy:** Arabic (RTL) first, English (LTR) second.

Product Ecosystem Surfaces

FULL-STACK

- **Web Application:** React 19 + Vite + Tailwind CSS (Production at `hesaby.aimicromind.com`).
- **Mobile Companion:** React Native + Expo SDK 54 (iOS & Android).
- **AI Engine:** Multimodal Gemini OCR + Contextual Arabic Audio Parsing.

2. Brand Name & Nomenclature

Nomenclature Structure

- **English:** Hesaby
- **Arabic:** حسابي
- **Domain / Suffix:** `Hesaby.ai`
- **Pronunciation:** /heh-SAH-bee/ (cadence stress on second syllable)

Cultural & Linguistic Meaning

"حسابي" in Arabic literally translates to *"my account"* or *"my calculation"*. In Egyptian colloquial speech, it carries an unmistakable aura of accountability and ownership: *"On my reckoning"*. It connects rigorous financial science with personal responsibility on the job site.

Brand Name Usage Rules

Form	Permitted Usage	Strictly Prohibited
Full Brand Name	`Hesaby.ai` (with `.ai` rendered in Ember Orange accent)	`hesaby.ai` (all lowercase), `HESABY.AI`
Standalone Name	`Hesaby` or حسابي	`HESABY`, `hesaby`, `He.Saby`, `Hesaby-ERP`

3. Logo & Visual Identity Creative Brief (Open Exploration)

Open Creative Mandate

Total Creative Freedom: The brand identity and logo mark for Hesaby are completely open for fresh conceptualization and original creative exploration. Do not copy or default to any existing template. We seek original, bold, iconic concepts that establish Hesaby as the definitive standard for Egyptian and regional construction technology.

3.1 What the New Mark Must Express

1. The Dual Nature of the Business

The tangible bridge between the **dusty physical job site** and the **rigorous corporate ledger**; between site custody cash and official bank statements; between Egypt's deep building craftsmanship and modern AI-driven velocity.

2. Solidity & Structural Permanence

The mark must feel load-bearing, permanent, and architectural — like something cast in reinforced concrete or forged in structural steel, not a lightweight or generic web icon.

3. Financial Precision & Institutional Trust

Contractors and owners entrust tens of millions of Egyptian Pounds to this software. The mark must inspire absolute audit-grade reliability and fiscal integrity.

4. Bilingual & Cultural Harmony

It must feel completely natural in an authentic Arabic context (حسابي) as well as an international Latin context (Hesaby.ai).

3.2 Four Conceptual Directions to Explore

DIRECTION A · ARCHITECTURAL

Structural Geometry & Load-Bearing Form

Metaphors of structural foundations, intersecting steel I-beams, architectural balance, modular grid systems, and load distribution. Heavy, structural, architectural, engineering-grade.

DIRECTION B · FINANCIAL

The Sovereign Ledger & Dynamic Equilibrium

Visual metaphors of double-entry accounting balance sheets, T-accounts, dynamic capital flow between site and office, ascending project profit margins, and indelible audit seals.

DIRECTION C · TYPOGRAPHIC

Bilingual Monogram & Cultural Ligature

An abstract fusion of the Arabic letter ح (Haa) with the Latin letter **H**, or a proprietary geometric ligature uniting Arabic calligraphy with Swiss minimalist precision.

DIRECTION D · TOOL

The Precision Site Instrument & Seal

The concept of an architect's indelible stamp, a surveyor's laser alignment tool, or a master contractor's signet. Rugged, professional, tool-like, and authoritative.

3.3 Visual Identity Guardrails

Strictly Avoid (Visual Clichés)

❌ **No cartoon hardhats or safety helmets** (patronizing to real engineers).
❌ **No generic cranes, brick walls, or house icons** (looks like a handyman service).
❌ **No generic gears or cogwheels** (dated industrial cliché).
❌ **No generic fintech swooshes or floating AI sparkles** (cheap SaaS trope).

Technical Success Criteria

✓ **Extreme Scale Range:** Instantly readable at 16×16px (favicon) up to billboard scale.
✓ **Monochrome Test:** 100% recognizable in pure solid black and solid white.
✓ **Grid Rigour:** Built on disciplined mathematical geometry and proportion.
✓ **Tactile Feel:** Looks stunning embossed on leather, cast on steel, or in glowing dark-mode UI.

4. Color System — "Ember Dark & Café Light"

Hesaby explicitly avoids sterile corporate blues and cold SaaS purples. The color system reflects the tactile atmosphere of construction: **warm glowing embers** on an evening job site, and **warm parchment accounting paper**.

4.1 Primary Brand Core — Ember Orange

Ember Orange (Primary)	Ember Dark	Ember Light
`#FF5A1F`	`#C2410C`	`#FF8A50`
CTAs, active tabs, brand focus rings	Light-mode CTAs, hover & pressed states	Dark-mode text accents, .ai suffix, glow highlights

4.2 Ember Dark Mode (Field & Night Operation)

Shell Canvas	Card Panel	Nested Surface	Warm Off-White
`#08080A`	`#0E0E12`	`#15151B`	`#F5F4F0`
Primary dark background	Card surfaces, sidebars	Inner table rows, inputs	Dark-mode primary text (never #fff)

4.3 Café Light Mode (Paper Ledger Accounting)

Café Canvas	Cream Panel	Tan Border	Walnut Ink
`#ECE5D6`	`#F7F1E5`	`#D8CBAF`	`#1C1710`
Parchment background	Card surfaces, panels	Subtle dividers & borders	Light-mode text (never #000)

4.4 Semantic Palette & Status States

Semantic State	Dark Mode Token	Light Mode Token	Operational Usage
Success / Matched	`#22C55E` (Emerald)	`#16A34A` (Deep Green)	Approved expenses, balanced custody, matched bank statement rows.
Danger / Overspent	`#EF4444` (Red)	`#DC2626` (Deep Crimson)	Overspent budget limits, rejected transactions, OCR confidence warnings.
Warning / Pending	`#EAB308` (Amber)	`#D97706` (Warm Ocher)	Pending GM sign-off, low inventory thresholds, unassigned custody.
Fire Glow	`rgba(255,90,31,0.45)`	`rgba(194,65,12,0.25)`	Ambient specular highlights and CTA drop-shadow halos.

Strict Color Prohibitions ("The Color Don'ts")

1. **No Cold Blue / Tech Violet:** Hesaby must never look like a generic fintech app or Discord/Slack clone.
2. **No Raw #000000 or Pure #FFFFFF:** All dark surfaces must preserve warm undertones; light surfaces must evoke tangible tactile paper.
3. **Monochrome Restraint:** Ember Orange is the single chromatic hero. Never introduce supplementary purple, cyan, or pink brand elements.

5. Typography & Multi-Script Architecture

The typography system is engineered for dual-script symmetry (Latin & Arabic), high-density data tables, and rapid legibility under direct sunlight.

5.1 Primary Font Stacks

Tier	Font Family	Script / Role	Weight Distribution
Primary Latin	**Inter Tight**	English headlines, UI labels, buttons, metrics	300 (Light) to 800 (Extra Bold)
Primary Arabic	**Cairo**	Arabic headlines, body copy, form fields, badges	400 (Regular) to 800 (Extra Bold)
Handwritten Latin	**Caveat**	Accent headline phrases ("Never lose a record.")	600, 700 (Semi / Bold)
Calligraphic Arabic	**Aref Ruqaa**	Accent Arabic phrases ("ولا قيد يضيع.")	700 (Bold)
Data & Numbers	**JetBrains Mono** / Inter	Financial ledgers, currency amounts, VAT %	Tabular numbers (`tabular-nums`)

5.2 Typographic Hierarchy & Scale

Level	Scale Size	Weight	Tracking	Linguistic Adaptation
Display / H1	`clamp(2.9rem, 7vw, 5.3rem)`	800	-0.05em (EN)	Arabic resets tracking to 0; line-height expands to 1.25.
Section / H2	`clamp(1.9rem, 4vw, 3rem)`	800	-0.04em (EN)	Arabic tracking 0; line-height expands to 1.4.
Card Title / H3	21px / 1.3rem	750	-0.025em	Snappy, confident, tight line-height.
Eyebrow Tag	11.5px / 0.72rem	800	+0.16em	Uppercase Latin; Ember Orange accent tint; bold dot separator.
Body Text	14.5px – 16.5px	450–500	Normal	Generous 1.65 line-height for high fatigue readability.
Financial Values	18px – 32px	700–800	-0.02em	Strictly formatted with `font-variant-numeric: tabular-nums` .

Latin Specimen · Inter Tight

Site Ledger EGP 2,450,000

Never lose a record on the job site.

Arabic Specimen · Cairo

6. Signature UI Components & Mechanics

Hesaby features a distinctive collection of proprietary UI components engineered to deliver tactile delight while remaining fully responsive and robust.

1. The Fire Button (Hero CTA)

SIGNATURE

Full-pill geometry with a convex top specular highlight and multi-layer warm amber drop shadow.

Start Free Trial — No Card →

```
background: linear-gradient(180deg, #ff7040 0%, #f04e00 60%, #d63a00 100%);
```

2. Tubelight Floating Navbar

PATENT FEEL

Translucent pill container with a physical "lamp bar" that casts a conic glow onto the active navigation target.

Dashboard Projects Ledger DSR

```
conic light cone + spring physics (stiffness: 380, damping: 32)
```

3. Sky Scene Day/Night Toggle

INTERACTIVE

Playful physical theme switch morphing between sunny day clouds and starry night cosmos.

Smooth 500ms cubic-bezier transition

4. Fanned Bento Display Stack

3D SKEW

Overlapping cards with `-skew-y-8deg` base tilt. Grayscale background cards un-dim on cursor hover.

Responsive: Auto-unfolds into vertical stack on mobile screens.

6.2 Depth Hierarchy & Background Physics

```
Background Texture:  72px architectural grid, rgba(255,255,255,0.045) strokes, radially masked
Surface Wash:        radial-gradient(1000px at 10% -120px, rgba(255,90,31,0.08), transparent 60%)
Tactile Grain:       SVG feTurbulence film noise at opacity: 0.09 for physical paper warmth
Primary Motion:      cubic-bezier(0.16, 1, 0.3, 1) — Snappy, deliberate Linear/Vercel-class ease
```

7. Brand Voice, Copywriting & Photography

7.1 Voice Attributes

Attribute	How Hesaby Speaks
Direct & Concise	Short, impactful sentences. Zero filler.
Concrete	Real numbers (EGP, tons, bags), real site friction.
Egyptian Peer	Speaks like a senior site engineer, not an academic.
Trustworthy	Rock-solid accounting rigor without boardroom jargon.

7.2 Strict Anti-Patterns

Forbidden Clichés (Never Use)

❌ "Revolutionize your workflow"
❌ "Powered by cutting-edge synergy"
❌ "Digital transformation made simple"
❌ "Next-generation cloud paradigms"

Rule: If a foreman on a 45°C site would roll his eyes at the phrase, strike it out immediately.

7.3 Key Brand Taglines (Bilingual Matrix)

Context	English Master Copy	Egyptian Arabic Master Copy
Brand Tagline	*"Your voice, instantly logged."*	"صوتك، حساباتك، فوزًا"
Hero Punchline	*"Say it. Snap it. It's already logged."*	"قولها. صوّرها. واتسجّلت خلاص"
The Core Pain	*"Your money disappears between site and office."*	"الفلوس بتضيع بين الموقع والمكتب"
Hardware Reality	*"Designed for sun, dust, and gloves."*	"مصمم للشمس والعفرة وسخونة الموقع"
Trust Guarantee	*"Free for 1 project · Arabic-first · Cancel anytime"*	"مجاني لمشروع واحد · عربي أولًا · إلغاء في أي وقت"

7.4 Photography & Visual Imagery Guidelines

- **Zero Stock Photography on Web:** All web storytelling is driven by live, interactive UI components and data simulations.
- **Real Site Imagery (Collateral):** Real Egyptian sites with unfinished concrete, rebar, desert dust, sun glare, and actual work clothing. Never show generic Western suburban construction or spotless hi-vis models wearing suits.
- **Lighting & Color Grading:** Golden-hour desert sun matching the warm Ember and Café color temperature.

8. Mobile App & RTL Bilingual Rules

8.1 Three Curated Mobile Themes (React Native App)

Theme Name	Visual Character & Aesthetic	Core Color Tokens
1. Monochrome	Neutral charcoal and off-white. 1:1 match with the web desktop dark mode.	Canvas `#141414`, Card `#1C1C1C`, Text `#FAFAFA`, Brand `#FF5A1F`
2. Obsidian & Emerald	Deep onyx black with crisp mint emerald accents. Modern, technical vibe.	Canvas `#0A0A0C`, Card `#121215`, Text `#F8FAFC`, Accent `#10B981`
3. Apple Liquid Glass	Authentic iOS/macOS frosted acrylic translucency. Specular rims. Light only.	Canvas `#EEF2F7`, Acrylic `rgba(255,255,255,0.78)`, Cupertino Blue `#0071E3`

8.2 RTL (Arabic) Structural Design Mechanics

Hesaby is designed **Arabic-First in market posture**, while maintaining code-first engineering parity in English.

Spatial Symmetry

- Complete logical mirroring via `margin-inline-start/end` and `padding-inline`.
- Sidebar & App Navigation positions on the Right in Arabic, Left in English.
- Shell corner radiuses mirror cleanly (`20px 0 0 0` in LTR vs. `0 20px 0 0` in RTL).

Arabic Script Dynamics

- **Tracking:** All negative letter-spacing is forced to `0` on Arabic glyphs.
- **Line Height:** Baseline height expands by 25% (H1: 1.0 → 1.25, H2: 1.05 → 1.4).
- **Motion Stagger:** Latin traces per-letter (55ms); Arabic traces per-word (240ms).

9. Competitive Positioning & Design Token References

9.1 Brand Positioning Contrast

Generic SaaS ERP (SAP, Odoo, Oracle)	Hesaby.ai Identity Position
Cold blue / enterprise grey color schemes	Warm Ember Orange on Charcoal & Parchment Paper
Sterile white backgrounds with razor-thin grey borders	Rich 4-tier depth hierarchy with ambient orange washes
Generic stock photography of clean executives in hard hats	Zero stock photos; live interactive UI simulators & real data
Formal, rigid Modern Standard Arabic (MSA) translations	Natural, punchy Egyptian colloquial accounting phrasing

9.2 Production Design Token Suite Directory

Module Area	Repository File Location	Token Implementation
Landing Page Tokens	`client/src/pages/Landing.css`	Full `--hx-*` design token suite
App Theme Shell	`client/src/app-theme.css`	Authenticated ERP shell color overrides
Mobile Theme Engine	`mobile/src/context/ThemeContext.js`	Monochrome, Obsidian, and Liquid Glass presets
Signature UI Components	`client/src/components/ui/*.jsx`	Tubelight, Sky Toggle, Handwriting, Display Cards

10. Designer Deliverables & Implementation Checklist

Contractor & Agency Action Items

The appointed brand designer, agency, or AI design system should deliver the following standardized assets, formatted in vector (SVG/AI/EPS), Figma Design System tokens, and print-ready CMYK/Pantone specifications.

10.1 New Logo & Core Identity System

- [ ] 3–5 Distinctly Original Logo Concepts (Structural, Ledger, Monogram, Tool)
- [ ] Primary Master Vector Logo Lockup in English (Hesaby.ai)
- [ ] Primary Master Vector Logo Lockup in Arabic (حسابي.ai)
- [ ] Dual-Script Bilingual Lockup Options
- [ ] Pure Monochrome Lockups (100% Solid Black, 100% Solid White)
- [ ] Complete App Icon Suite (iOS Liquid Glass, Android Adaptive, macOS)
- [ ] Multi-Scale Favicon Asset Bundle (16, 32, 48, 180, 192, 512px + ICO)
- [ ] Geometric Construction Breakdown & Optical Clear Space Rules

10.2 Color & Typographic Standards

- [ ] Pantone & CMYK Print Equivalents for Ember Orange (#FF5A1F)
- [ ] WCAG 2.1 AAA Accessibility Contrast Verification Matrix
- [ ] Bilingual Type Specimen Booklets (Inter Tight & Cairo)

10.3 Brand Collateral & Stationery

- [ ] Bilingual Executive Business Cards (Front English, Back Arabic)
- [ ] Official Construction Firm Tax Invoice & Receipt Template (A4)
- [ ] Corporate Keynote & Slide Deck Master Template (Dark & Light)
- [ ] Executive HTML Email Signature Kit
- [ ] Physical Site Gear Mockups (Hard hats, site engineer field books, vests)

10.4 Marketing & Digital Guidelines

- [ ] Apple App Store Screenshot Frame Templates (6.7" & 6.5")
- [ ] Google Play Store Feature Graphic (1024×500)
- [ ] Construction Trade Fair Roll-up Banner Design (85×200cm)
- [ ] Figma Component Library (.fig file with structured variables)
