BUG REPORT — RETEST ROUND 2

Assist of Engineers — Web Application

Persona tested	Admin
Test round	Round 2 (after fixes from Round 1)
Source	Original UAT notes (handwritten, 11 pages) + Round 2 retest screenshots
Document purpose	Track bugs that remain unresolved after development fixes were applied
New screenshots	4 new images attached (Round 2 retest)

Status & Severity Legend

STILL OPEN — bug was reported in Round 1 and is still present after fix attempt.
NEW FINDING — bug discovered during Round 2 retest.

Critical	Page or feature is unusable; blocks core workflow.
High	Major feature broken or producing data errors.
Medium	Feature works but with significant friction or missing pieces.
Low	Cosmetic, naming, or minor UX issues.

Section 1 — Round 2 Retest Findings

The bugs in this section have been re-verified after development fixes. Each one was confirmed STILL OPEN during Round 2 testing. New screenshots are included where applicable.

BUG-U04 — Dark mode resets when navigating between pages

Severity: Medium **Status:** STILL OPEN

Area: Theme / appearance — global

Description: When dark mode is enabled, simply navigating to another page (for example, from Projects to Suppliers) causes the app to revert to white/light mode. The theme setting is not persisted across page transitions.

Steps to reproduce: 1) Enable dark mode while on the Projects page. 2) Navigate to the Suppliers page (or any other page). 3) Observe the theme.

Expected: Dark mode persists across all pages until the user explicitly disables it.

Actual: Theme reverts to white/light mode on every page navigation.

Retest note: *Originally reported in Round 1 as an issue triggered by sidebar navigation / screenshots. In Round 2 the trigger is even broader — any page-to-page navigation resets the theme.*

BUG-U05 — Delete confirmation dialog needs redesign (Clients page)

Severity: Low **Status:** STILL OPEN

Area: Clients page → Delete confirmation modal

Description: The current delete confirmation dialog is small, has poor visual hierarchy, and does not match the design language requested. It should be redesigned to match the new mockup (larger, centered icon at top, clearer typography, primary button in accent color).

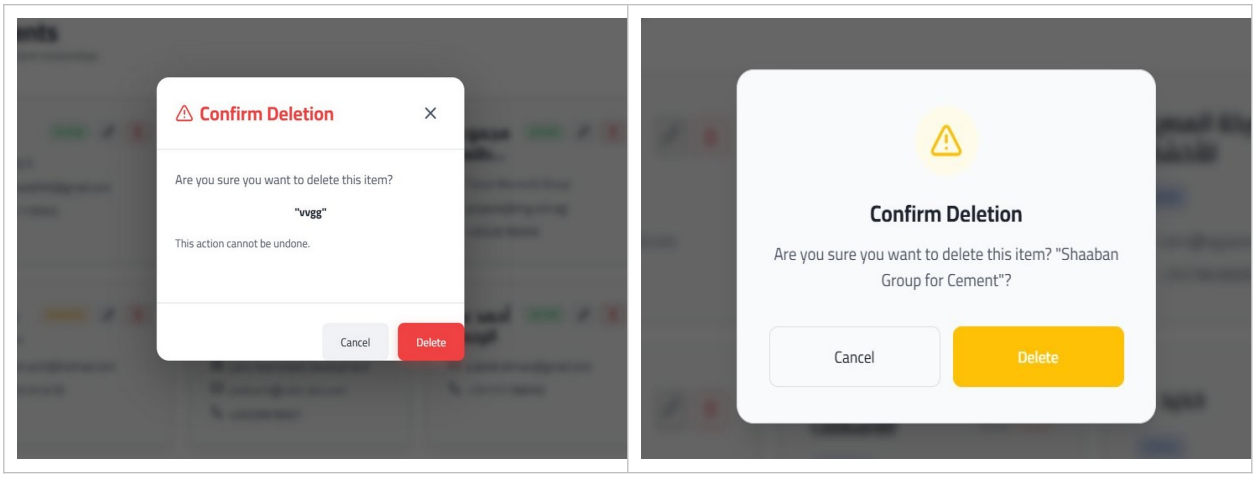

Steps to reproduce: 1) Open Clients page. 2) Click the delete icon on any client row.

Expected: Modal matches the new design (Image 2 below): centered yellow warning icon, larger heading, item name in quotes inside the message, two clearly differentiated buttons.

Actual: Modal still shows the old layout (Image 1 below): icon next to title, small dimensions, action description split across multiple lines.

Retest note: *Side-by-side comparison provided. Image 1 = current state. Image 2 = desired/target state.*

BEFORE — current dialog	AFTER — desired design

BUG-F17 — Two-Factor Authentication (2FA) still does not work

Severity: High **Status:** STILL OPEN

Area: Security → 2FA

Description: Originally reported as 'Failed to load 2FA stats' on opening the 2FA section. After the fix attempt, the 2FA flow is still not functional.

Steps to reproduce: 1) Open Security menu. 2) Click on Two-Factor Authentication.

Expected: 2FA setup page loads and works (QR scan + manual secret entry, both confirmed working in Round 1).

Actual: Same failure as Round 1 — 2FA still does not work.

Retest note: *User confirmed: 'Still the same issue with two-factor doesn't work.'*

BUG-U06 — Supplier "Other" category still missing free-text input

Severity: Medium **Status:** STILL OPEN

Area: Supplier tab → Supplier / Product Category field

Description: When the user selects the "Other" option in the supplier or product category field, the form should reveal an additional text input so the user can type the custom value. This input is still not appearing after the fix attempt.

Steps to reproduce: 1) Suppliers tab → Add new supplier. 2) In the category field, select "Other".

Expected: An additional text input appears for the user to write the custom category/product.

Actual: No input field is added; the user has no way to specify the custom value.

Retest note: *User confirmed: "Still the same issue with the suppliers. When choosing the field option, others must add another tab to write what I need inside it."*

BUG-RM (group) — Raw Material tab — multiple issues still open

Severity: High (cluster) **Status:** STILL OPEN

Area: Raw Material tab

Description: User confirmed: "Still the same issue in the Raw material tab." All originally reported issues remain unresolved:

- **BUG-F04 (High) — Cannot edit or delete raw materials:** Edit and Delete buttons still missing on raw material rows.
- **BUG-F05 (High) — Record Usage button does nothing:** Clicking Record Usage still does not save anything; Material Batch / Raw Material data does not auto-pull.
- **BUG-U07 (Medium) — No per-project view of raw materials:** Still missing — users need a screen showing each project with its associated raw materials.
- **BUG-U08 (Medium) — No filter on Raw Material tab:** Filter by project / date / category still not implemented.

BUG-LS (group) — Labor & Subcontractors — multiple issues still open

Severity: Medium (cluster) **Status:** STILL OPEN

Area: Labor & Subcontractors tab

Description: User confirmed: "Still the same issues with Labor and Subcontractor." Originally reported issues remain:

- **BUG-F06 (Medium) — Adding new workman is extremely slow (~2 minutes):** Performance issue not fixed.
- **BUG-U09 (Medium) — Multi-select Role filter still missing:** Need a dropdown with multi-select (Painter, Foreman, Engineer, etc.).
- **BUG-U10 (Low) — Custom trade ("Other") not auto-added to home filter:** When adding workman with custom trade, the new value still does not appear as a filter option.

BUG-CA (group) — Chat Assistant — multiple issues still open

Severity: Medium (cluster) **Status:** STILL OPEN

Area: Chat Assistant

Description: User confirmed: "Still the same issues with Chat Assistant." Originally reported issues remain:

- **BUG-F18 (Medium) — Replies in Arabic to English questions:** Response language does not follow input language.
- **BUG-U16 (Low) — Chat history not formatted as conversation thread:** Should render as alternating AI / user messages.
- **BUG-U17 (Low) — Tips icon should be repositioned:** Move tips icon to top-right corner; click should reveal three tips.

BUG-F11 — Invoice email send still fails — SMTP error confirmed

Severity: High **Status:** STILL OPEN

Area: Invoices tab → Send invoice via email

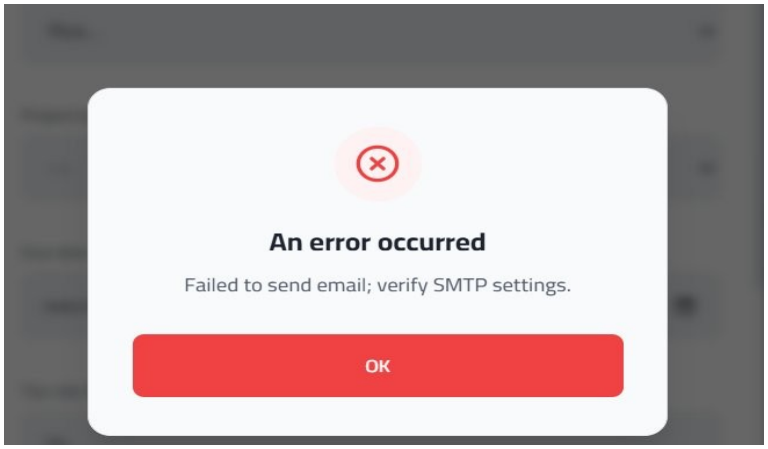

Description: Sending an invoice via email returns "An error occurred — Failed to send email; verify SMTP settings." The error is the same as Round 1; the fix attempt did not resolve the SMTP issue.

Steps to reproduce: 1) Invoices tab → New Invoice → Save Draft. 2) Click Send via Email.

Expected: Invoice is delivered to the recipient via email.

Actual: Error dialog: "Failed to send email; verify SMTP settings." (See screenshot below.)

Retest note: *Screenshot from Round 2 retest attached.*

Round 2 retest — SMTP error dialog still appears when sending invoice by email.

BUG-F14 — Bank Reconciliation — CSV upload still fails (now reports missing date column)

Severity: **Critical** **Status:** **STILL OPEN**

Area: Bank Reconciliation → Upload CSV

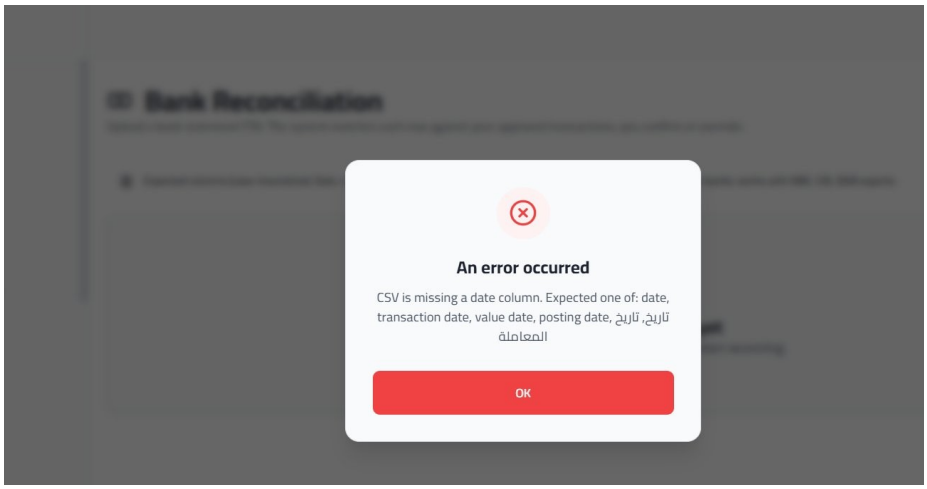

Description: Uploading a CSV file returns "An error occurred — CSV is missing a date column. Expected one of: date, transaction date, value date, posting date, تاريخ, تاريخ المعاملة." Important: the user confirms the uploaded CSV already contains a date column. The parser is not detecting the date column correctly.

Steps to reproduce: 1) Bank Reconciliation page. 2) Upload a CSV file that contains a date column with a standard header.

Expected: CSV is parsed; transactions are loaded for matching.

Actual: Error dialog: "CSV is missing a date column..." even when the column is present in the file. (See screenshot below.)

Retest note: *Round 2 retest — error message has changed from a generic load error to a specific (but incorrect) date-column error. The parser logic for detecting date columns is broken or too strict (it may not recognize the user's exact column header). Recommend: log the raw CSV header server-side, and broaden the matching logic (case-insensitive, trim, allow common variants).*

Round 2 retest — Bank Reconciliation rejects a CSV that does contain a date column.

BUG-TM (group) — Team Management — multiple issues still open

Severity: High (cluster) **Status:** STILL OPEN

Area: Team Management tab

Description: User confirmed: "Still the same issues with Team Management." Originally reported issues remain:

- **BUG-F15 (High) — Validation rejects valid passwords with #:** Password containing "#" is still rejected with "must use #" message; errors still appear one at a time instead of all at once.
- **BUG-U19 (Medium) — Role filter still missing:** Cannot filter team members by role.
- **BUG-U20 (Low) — Quick "Email" action still missing:** No way to email a team member directly from the row.

Section 2 — Other Round 1 Bugs (re-verification pending)

These bugs were reported in Round 1 but not specifically called out by the user during Round 2 retest. They should be re-verified before closing.

BUG-F01 — Hard refresh shows generic error

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Global / Admin pages

Description: Performing a hard refresh on any admin page returns only "An error occurred." with no useful diagnostic info.

BUG-F02 — "New Client" button broken in New Project flow

Severity: High **Status:** PENDING RE-VERIFICATION

Area: Project tab → Add New Project → Add New Client

Description: Clicking the New Client button inside the new-project flow does nothing; the client is not created.

BUG-F03 — Cannot change client status from Active to Inactive

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Clients tab

Description: Only the 'Pending' status option is available; Active and Inactive options are missing from the change-status control.

BUG-F07 — "Database error" when adding a new expense

Severity: Critical **Status:** PENDING RE-VERIFICATION

Area: Accounting → New Transaction → New Item

Description: Adding a new expense returns 'Database error.' The error reappears for any new-item addition in this flow.

BUG-F08 — "Existing Item" selector behaves incorrectly

Severity: High **Status:** PENDING RE-VERIFICATION

Area: Accounting → New Transaction → Existing Item

Description: Even after selecting an existing item, the form still says "Select at least one." Cost Category is also pre-chosen incorrectly instead of being driven by the selected item.

BUG-F09 — Stale data persists across tabs

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Accounting (multi-tab forms)

Description: When navigating between tabs, data from the previous tab remains and must be cleared manually.

BUG-F10 — Reports tab fails to load (Database error P2022)

Severity: Critical **Status:** PENDING RE-VERIFICATION

Area: Reports tab

Description: Navigating to the Reports tab immediately throws "Database error P2022."

BUG-F12 — AI Drafts: receipt upload returns an error

Severity: High **Status:** PENDING RE-VERIFICATION

Area: AI Drafts tab

Description: Uploading a receipt draft (invoice) returns an error.

BUG-F13 — AI Drafts: cannot edit an existing draft

Severity: High **Status:** PENDING RE-VERIFICATION

Area: AI Drafts tab

Description: Reopening an existing draft to edit it succeeds, but no edits can be saved (e.g., project name cannot be changed).

BUG-F16 — Billing page returns "network connection" error

Severity: Critical **Status:** PENDING RE-VERIFICATION

Area: Billing tab

Description: Navigating to the Billing tab returns a network connection error.

BUG-U01 — 2FA section is buried under Security menu

Severity: Low **Status:** PENDING RE-VERIFICATION

Area: Two-Factor Authentication navigation

Description: 2FA entry point should be more discoverable from the user/profile area.

BUG-U02 — Two cards (Enable/Disable) render but behave inconsistently

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Two-Factor Authentication UI

Description: Enable and Disable controls display as two cards, but interactions are inconsistent. Should be unified into a clear single toggle.

BUG-U03 — Tab switching shows error mid-navigation

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Global tab navigation

Description: Switching between top-level tabs intermittently shows an error message.

BUG-U11 — Cost Category list should be limited to 3 items

Severity: Low **Status:** PENDING RE-VERIFICATION

Area: Accounting → New Transaction → Financial details

Description: The "Cost Category" field should display only the three relevant categories instead of the full list.

BUG-U12 — Each category needs its own Items tab

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Accounting → New Transaction

Description: Add a dedicated tab for items per category, where new items can be created and listed.

BUG-U13 — Rename "Cost Center"

Severity: Low **Status:** PENDING RE-VERIFICATION

Area: Accounting

Description: "Cost Center" should be renamed to something more meaningful and intuitive for end users.

BUG-U14 — Rename "Physical Account"

Severity: Low **Status:** PENDING RE-VERIFICATION

Area: Income tab

Description: Same naming/clarity issue as Cost Center; rename based on actual function.

BUG-U15 — Clarify "Finance — My Ledger"

Severity: Low **Status:** PENDING RE-VERIFICATION

Area: Finance / My Ledger

Description: Tab label is ambiguous; either define the function in tooltip/help or rename.

BUG-U18 — Invoices tab needs the same filters as Labor & Subcontractors

Severity: Medium **Status:** PENDING RE-VERIFICATION

Area: Invoices tab

Description: Add the same multi-select filtering UX used in Labor & Subcontractors.

BUG-U21 — Returning to Billing area resets to first tab

Severity: Low **Status:** PENDING RE-VERIFICATION

Area: Billing (and sibling tabs)

Description: When navigating back to Billing or a related tab, the app jumps to the first tab instead of preserving the user's last position.

Section 3 — Summary Table (Round 2)

All bugs sorted by status and severity. Bugs explicitly confirmed STILL OPEN by the user during Round 2 retest are at the top.

ID	Title	Area	Severity	Status
BUG-F11	Invoice SMTP send error	Invoices	High	STILL OPEN
BUG-F14	Bank Reconciliation CSV — date column not detected	Bank Reconciliation	Critical	STILL OPEN
BUG-F17	2FA still does not work	Security / 2FA	High	STILL OPEN
BUG-F04	Cannot edit/delete raw materials	Raw Material	High	STILL OPEN
BUG-F05	Record Usage button does nothing	Raw Material	High	STILL OPEN
BUG-F06	Adding workman takes ~2 minutes	Labor & Subcontractors	Medium	STILL OPEN
BUG-F15	Team Management password validation loop	Team Management	High	STILL OPEN
BUG-F18	Chat replies in Arabic to English question	Chat Assistant	Medium	STILL OPEN
BUG-U04	Dark mode resets between pages	Theme	Medium	STILL OPEN
BUG-U05	Delete confirmation dialog needs redesign	Clients	Low	STILL OPEN
BUG-U06	Supplier "Other" missing free-text input	Supplier	Medium	STILL OPEN
BUG-U07	Need per-project view of raw materials	Raw Material	Medium	STILL OPEN
BUG-U08	Raw Material missing filter	Raw Material	Medium	STILL OPEN
BUG-U09	Labor & Subcontractors multi-select role filter	Labor & Subcontractors	Medium	STILL OPEN
BUG-U10	Custom trade not auto-added to filter	Labor & Subcontractors	Low	STILL OPEN
BUG-U16	Chat history thread layout	Chat Assistant	Low	STILL OPEN
BUG-U17	Reposition tips icon	Chat Assistant	Low	STILL OPEN
BUG-U19	Team Management role filter	Team Management	Medium	STILL OPEN
BUG-U20	Team Management Email action	Team Management	Low	STILL

ID	Title	Area	Severity	Status
				OPEN
BUG-F07	Database error adding new expense	Accounting	Critical	PENDING
BUG-F10	Reports tab error P2022	Reports	Critical	PENDING
BUG-F16	Billing network connection error	Billing	Critical	PENDING
BUG-F02	New Client button broken in New Project flow	Project	High	PENDING
BUG-F08	Existing Item selector broken	Accounting	High	PENDING
BUG-F12	AI Drafts receipt upload error	AI Drafts	High	PENDING
BUG-F13	AI Drafts cannot edit existing draft	AI Drafts	High	PENDING
BUG-F01	Hard refresh generic error	Global	Medium	PENDING
BUG-F03	Cannot change client status to Inactive	Clients	Medium	PENDING
BUG-F09	Stale data persists across tabs	Accounting	Medium	PENDING
BUG-U02	Enable/Disable cards inconsistent	2FA	Medium	PENDING
BUG-U03	Tab-switching error message	Global	Medium	PENDING
BUG-U12	Items tab needed per category	Accounting	Medium	PENDING
BUG-U18	Invoices needs filters	Invoices	Medium	PENDING
BUG-U01	2FA buried under Security	2FA	Low	PENDING
BUG-U11	Cost category should show only 3	Accounting	Low	PENDING
BUG-U13	Rename "Cost Center"	Accounting	Low	PENDING
BUG-U14	Rename "Physical Account"	Income	Low	PENDING
BUG-U15	Clarify "Finance — My Ledger"	Finance	Low	PENDING
BUG-U21	Billing tab resets on return	Billing	Low	PENDING
